

**WIND CURTAINS
AND SHIELDS**

WIND CURTAINS AND SHIELDS

Curtains and wind shields are made of high quality meshes and foils, resistant to UV radiation. The meshes are made of durable, high quality plastic. On request, we finish them with double openwork stitching, stitches or eyelets, depending on the mounting option. We offer curtains and shields according to individual customer needs.

Wind mesh shields

Single and insulated curtains (3-layer)

PRODUCT ADVANTAGES:

- fresh air without extracts provides natural ventilation, limiting the build-up of gas concentrations in the building,
- healthy and stable climate guarantees animals' well-being, and thus increases the effects of breeding and positively impacts on production effects,
- provide natural lighting of the building,
- materials used for production perfectly protect animals from wind,
- construction made to individual needs is durable and solid.
